Performance (Direct Plan - Growth)

Period	Fund	Benchmark (FS Large Cap 100 TRI)
1 year (absolute)	32.43%	27.29%
3 years (CAGR)	22.84%	21.78%

Past performance may or may not be sustained in future. Returns are computed from NAV of the Direct Plan - Growth option and are net of expenses.

Risk Statistics

Measure	Value
Standard deviation (annualised)	13.75%
Beta (vs benchmark)	0.91
Sharpe ratio	1.06
Portfolio turnover ratio	0.24 times

Risk statistics are calculated on daily returns over the trailing three years. The Sharpe ratio uses a risk-free rate of 6.50% per annum.

Fund Manager Commentary

Markets were range-bound during the half-year. We maintained a diversified large-cap portfolio with technology as the second-largest sector. The fund continues to avoid highly leveraged companies, and cash was held at about 5.8% of net assets to meet redemptions.

Outlook

We expect credit growth to support bank earnings, but valuations in parts of consumer goods remain elevated. We will continue to prefer companies with strong balance sheets and consistent cash flows.
