Performance (Direct Plan - Growth)

Period	Fund	Benchmark (FS Large Cap 100 TRI)
1 year (absolute)	6.82%	3.21%
3 years (CAGR)	21.00%	19.64%

Past performance may or may not be sustained in future. Returns are computed from NAV of the Direct Plan - Growth option and are net of expenses.

Risk Statistics

Measure	Value
Standard deviation (annualised)	14.65%
Beta (vs benchmark)	0.92
Sharpe ratio	0.90
Portfolio turnover ratio	0.28 times

Risk statistics are calculated on daily returns over the trailing three years. The Sharpe ratio uses a risk-free rate of 6.50% per annum.

Fund Manager Commentary

Why has the fund's risk increased? Over the six months to March 2026, we raised the allocation to financial services from 29.8% to 34.2% by adding to private sector banks and Trident Finance Corporation, and reduced information technology from 16.3% to 14.1%. As a result the top 10 holdings now make up 51.8% of the portfolio, up from 47.3%, so the portfolio is more concentrated. The market was also more volatile in January to March 2026, and the three-year standard deviation of the fund rose from 13.75% to 14.65%.

Outlook

We expect credit growth to support bank earnings, but valuations in parts of consumer goods remain elevated. We will continue to prefer companies with strong balance sheets and consistent cash flows.
